FOREWORD

This report is one of a series of provincial reports on the results of the 1980 Census of Population and Housing conducted on May 1, 1980.

Demographic data presented herein consist of population distributions according to age, sex, marital status, highest grade completed and literacy. Other bases as gainful occupation, industry and migration are included likewise.

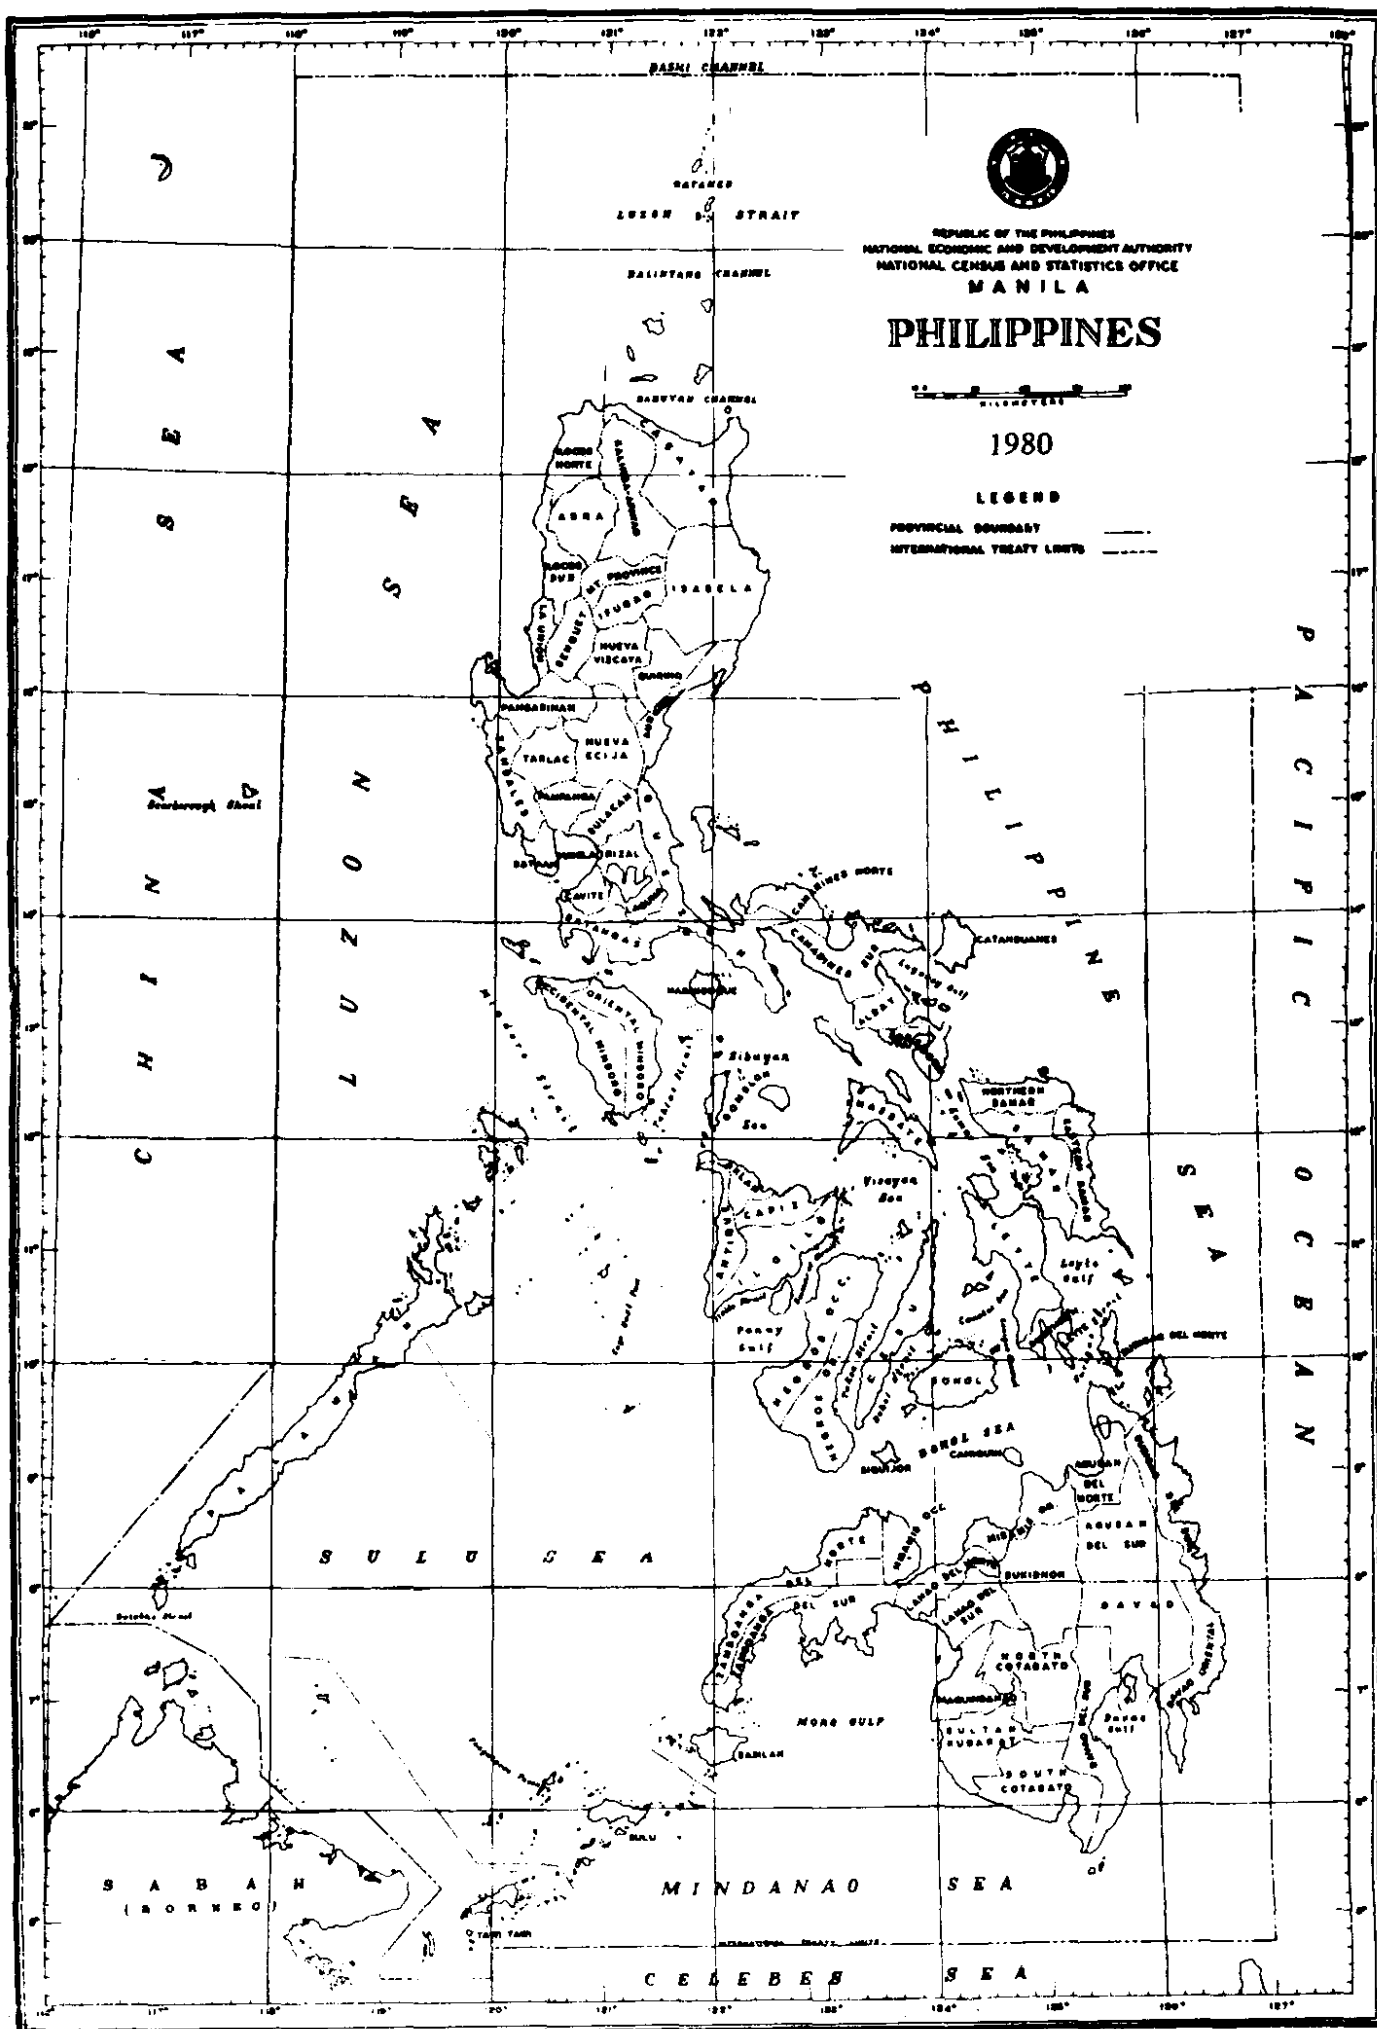

In the other aspect of the census, the following housing characteristics are considered: type of building, structural characteristics, floor area, type of tenure, use and source of water supply, lighting, type of toilet facilities, kind of cooking fuel used and appliances.

Subsequent issues will be the National Summary (Volume II) containing summary data on the final provincial reports and the Special Volume on National Capital Region (Metro Manila Area) which will cover data on the social, economic and demographic characteristics of the region.

Grateful acknowledgment is due the National Census Coordinating Board, government agencies, committees and the local coordinating boards for their invaluable assistance and cooperation.

Explanatory Text

GENERAL

INTRODUCTION

The National Census and Statistics Office conducted in May 1980, the 1980 Census of Population and Housing. This type of Census was also undertaken in May 1970. In May 1975 the Census of Population was taken as Phase I of the 1975 Integrated Census of the Population and Its Economic Activities. This nationwide undertaking was designed to obtain comprehensive data on the size, distribution, structure, change and socio-economic characteristics of the population and to take inventory of the housing accommodations, their geographic location, structural characteristics, available facilities, etc.

The population report contains data gathered from private households as well as collective households, while data on housing were collected from private households only.

It should be emphasized at this point that a complete enumeration of all households throughout the country was made but only sample household questionnaires representing 20 percent of the listed households were processed and the data published in this volume. In so doing, however, the total population count by barangay, male and female, obtained from the listing sheet taken simultaneously during the enumeration was maintained in computing the weights or expansion factors. It should also be noted that data on Tables 1 to 4 of the population tables refer to total population, that is, the population of the private households plus the collective households while Tables 5 to 10 cover exclusively the private household population.

Pursuant to the provision of Batas Pambansa Bilang 72, a final count of the population, by sex at barangay level was submitted to the President and was approved under Proclamation No. 2170 dated March 12, 1982. This report was published separately in 74 provincial volumes.

AUTHORITY FOR THE 1980 CENSUS

Under Commonwealth Act No. 591, the National Census and Statistics Office is authorized "to prepare for and undertake all censuses of population, agriculture, industry and commerce."

It may be mentioned in this regard that sometime in February 1980 Parliamentary Bill No. 809 was presented at the Batasang Pambansa, providing for the taking of an integrated census every ten years beginning 1980, with May 1 of every census year as the reference date. This bill was approved into Batas Pambansa Bilang 72 on June 11, 1980, more than one month after the start of enumeration.

INTER-AGENCY PARTICIPATION

The expertise and technical advice of the National Economic and Development Authority Inter-Agency Committee on Population and Vital Statistics and its Technical Working Group on 1980 Census of Population and Housing played a vital role in the successful undertaking of the census.

The Committee's main function was to review the questionnaire, methodologies, concept, tabulation and other related aspects of the census in the production of data and development of systems that would produce more reliable and accurate result. It had for its chairman the Dean of the University of the Philippines Population Institute (UPPI) and for its members, one representative each from the Ministries of Human Settlements (MHS), National Defense (MND), Education and Culture (MEC), Health (MOH) and Local

EXPLANATORY TEXT

Government and Community Development (MLGCD); the Commission on Population (POPCOM); National Economic and Development Authority (NEDA); and two representatives from the National Census and Statistics Office (NCSO). The Technical Working Group (TWG) for the 1980 Census of Population and Housing was headed by the Chief of the National Census and Household Surveys Department of NCSO and the members were representatives from the MHS, EPRS-NEDA, SCO-NEDA, POPCOM, UPPI, MOH, MEC, and the National Housing Authority (NHA).

Recommendations were likewise solicited from other government agencies for questions that should possibly be included in the population and housing portions in order to fill their data needs.

As early as August 1977, an NCSO Technical Committee for censuses was created. Ranking officials of the National Census and Statistics Office comprised the committee, with the Assistant Executive Director as Chairman, the Chief of the National Census and Household Surveys Department (NCHSD) as Vice-Chairman and Heads of six other departments and staff offices as members.

The committee coordinated with the Inter-Agency Committee and TWG of the NEDA on the technical aspect of the census and rendered a monthly progress report to the Executive Director. It provided the overall direction of the activities of the different subcommittees on census. The two subcommittees created, the Sub-Committee on Population and Housing Census and the Sub-Committee on Operations and Logistics Support, were directly charged with the preparatory work for the census undertaking.

CENSUS BOARDS

A systematized involvement of government agencies and instrumentalities was made possible largely through the concerted efforts of the members of the National Census Coordinating Board (NCCB) and the Provincial, City and Municipal Census Boards. The national board was created by NEDA Memorandum Order No. 4-80, dated April, 1980 and the local boards, by Memo Order No. 5-80, dated April 1, 1980, by virtue of the powers vested in the Minister of Economic Planning under Section 3 of Presidential Decree No. 1200.

The NCCB was headed by the Minister of Economic Planning as Chairman with the Executive Director as Executive Officer. Named as members were the Ministers of Agriculture, Budget, Education and Culture, Finance, Human Settlements, Public Works, Justice, Labor, Local Government and Community Development, National Defense, Natural Resources, Public Highways, Public Information and Transportation and Communication. Rules and regulations necessary for the successful undertaking of the census were issued by the Board.

At the local government level, similar functions were carried out by the Provincial City and Municipal Census Boards. The Provincial Governor headed the Provincial Census Board while the Division Superintendent of Schools was Vice-chairman. Members were the Highway District Engineer, Provincial Auditor, Provincial Commander of the Philippine Constabulary, the Provincial Development Officer and the Provincial Agriculturist. The City Census Board was composed of the City Mayor as Chairman; City Superintendent of Schools, Vice-chairman; and the City Engineer, City Assessor and City Development Officer, members. Finally, the Municipal Census Board had for its Chairman the Municipal Mayor and ably assisted by the District Supervisor as Vice-chairman. The members were the Municipal Agriculturist, Station Commander, Municipal Treasurer and the Municipal Development Officer.

EXPLANATORY TEXT

For each of these local census boards, the Provincial Census Officer, City Census Officer and the Municipal Census Officer were designated Executive Officer of their respective Board.

CENSUS ORGANIZATION

The overall direction and instructions for the census undertaking emanated from the Executive Director of the National Census and Statistics Office or in his absence, the Assistant Executive Director.

Assisted by the Task Force from the Central Office and in coordination with the local census boards, the Regional Census Officers and the Provincial Census Officers directly supervised the field operations in their respective areas. The services of District Supervisors, Head Teachers and elementary school teachers from public schools were utilized as City/Municipal Census Supervisors, Team Supervisors and Enumerators in that order.

During the field operations, the 1980 Census Operations Center under the overall supervision of the National Census and Household Surveys Department Chief, was the operating body that monitored the overall operations. Lending support to the center were the Administrative and Fiscal Services Staff.

METHOD OF ENUMERATION AND USE OF SAMPLING

The household was used as the enumeration unit and a complete listing of dwelling units, including vacant ones, was done.

A combination of complete enumeration and sampling was adopted. While all households were asked on the count of the population and housing characteristics, only twenty percent (20%) were asked on other characteristics. The selection of sample households was done systematically with a random start from a listing of households which was prepared simultaneously with the enumeration.

Using PH Form 2 (Common Private Household Questionnaire) and with an 80 percent coverage, the items asked on population were household membership, relationship to head, line number of mother, sex, date of birth, age as of last birthday and marital status. For the housing items, the type of building and the construction materials of roof and outer walls, number of rooms, floor area of the dwelling unit and the year the building was built were asked.

In addition to the population and housing items just mentioned, additional information were asked using PH Form 3 (Sample Private Household Questionnaire) from the 20 percent samples such as language or dialect generally spoken at home, citizenship, usual residence of mother at person's birth, residence of person in 1975, ability to speak Pilipino and English, school attendance, highest grade completed, literacy, economic activity of the person, place of schooling or work, fertility, nature of occupancy of the dwelling unit and housing facilities and conveniences.

Collective households were enumerated using PH Form 4, where the information asked were the same as those in PH Form 2, excluding housing items.

PLACE WHERE ENUMERATED

All persons were enumerated in their usual place of residence, which is the geographic place (street, barangay, sitio, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he usually sleeps; therefore, it may be the same as or different from the place where he was found at the time of the census.

EXPLANATORY TEXT

POST ENUMERATION SURVEY

Originally the plan was to conduct a Post Enumeration Survey covering the whole country. For lack of funds the survey had to be confined to Metro Manila. Its purpose was to determine the extent of underenumeration or overenumeration in the 1980 Census of Population and Housing.

A sample of 132 barangays was selected. However, in 59 barangays which were divided into two or more enumeration areas (EAs), an enumeration area was chosen as sample.

A complete listing was made of households in the sample barangays/EAs using PH Form 1-B. Twenty percent of these households were selected as sample households and interviewed using PH Form 2, which was the same questionnaire used for non-sample households during the main enumeration. The housing portion of this form was disregarded.

CONTENT AND COVERAGE OF THE PUBLICATION

In this publication, the population and households were described according to the respective items listed below:

Population Items	Housing Items
Age	Type of Building
Sex	Type of Occupancy
Marital Status	Construction Materials of Roof and Outer Walls
Highest Grade Completed	Year Built
Literacy	Floor Area of Dwelling Unit
Language/Dialect Spoken in the Household	Tenure of Owner-Occupant with Respect to the Land
Gainful and Non-Gainful Occupation	Kind of Lighting Facilities
Major and Minor Industry	Use and Source of Water Supply
Migration	Type of Toilet Facilities
	Kind of Cooking Fuel
	Household Appliances

The above items are presented in the ten population tables and nine housing tables of this report.

Except for figures on total population and sex, all other characteristics were based on a 20 percent sample.

Aside from these published tables, 10 other tables on the above characteristics plus 6 statistical tables dealing on ever-married women 15 years old and over are also available to statistical users.

DEFINITION OF TERMS AND CONCEPTS

I – POPULATION

BARANGAY

A barangay is the smallest political unit in the country and generally its enumeration is

EXPLANATORY TEXT

assigned to one enumerator. For enumeration purposes, a large barangay is usually split into parts and each part is called an enumeration area (EA).

ENUMERATION AREA

An enumeration area (EA) is a delineated area assigned to one enumerator, usually consisting of about 300 households. A barangay or part of a barangay may have been designated as an enumeration area.

URBAN AND RURAL AREAS

The same concepts used in the 1970 and the 1975 Censuses were followed in classifying areas as urban. According to these concepts, urbanized areas consist of:

1. In their entirety, all cities and municipalities having a population density of at least 1,000 persons per square kilometer.
2. Poblaciones or central districts of municipalities and cities which have a population density of at least 500 persons per square kilometer.
3. Poblaciones or central districts (not included in 1 and 2), regardless of the population size, which have the following:
 - a. Street pattern, i.e., network of streets in either parallel or right-angle orientation;
 - b. At least six establishments (commercial, manufacturing, recreational and/or personal services); and
 - c. At least three of the following:
 - 1) A town hall, church or chapel with religious services at least once a month;
 - 2) A public plaza, park or cemetery;
 - 3) A market place or building where trading activities are carried on at least once a week;
 - 4) A public building like a school, hospital, puericulture and health center or library.
4. Barangays having at least 1,000 inhabitants which meet the conditions set forth in 3 above, and where the occupation of the inhabitants is predominantly non-farming or fishing.

All areas not falling under any of the above classifications are considered rural.

PERSONS ENUMERATED IN A PRIVATE HOUSEHOLD

The following were counted and enumerated as members of the household:

1. Persons whose usual place of residence is the place where the household lives and present at the time of visit of the enumerator, except those born after 12:01 A.M., May 1, 1980;
2. Persons whose usual residence is the place where the enumerated household lives, but temporarily away at the time of enumeration, such as:
 - a. persons temporarily away on vacation, business or pleasure trip or any other purpose in the Philippines who are expected to be back within six months,

EXPLANATORY TEXT

- or within one year, if abroad;
 - b. students who usually go home to their respective households at least once a week;
 - c. persons working elsewhere who usually go home to their respective households at least once a week;
 - d. patients confined in hospitals for not more than six months at the time of enumeration of the household, except those confined (1) as inmates (not patients in wards for temporary confinement) in tuberculosis pavilions; (2) in mental hospitals; (3) in leprosaria or leper colonies; and (4) in rehabilitation centers for drug addicts;
 - e. trainees in the Armed Forces of the Philippines, if their training is not more than six months;
 - f. convicts and detainees in provincial or municipal/city jails or military camps, who have been confined for not more than 6 months at the time of enumeration of the household, except those who have been sentenced for more than 6 months (including those whose sentence is on appeal), even though just confined; and
 - g. officers and crew members of coastal, interisland, or fishing vessels; officers and crew members of ocean-going vessels who usually go home to their household at least once a year.
3. Boarders of the household who are working, looking for work or studying, and who do not go home at least once a week;
 4. Employees of household-operated enterprises who eat and sleep with the household and who do not go home at least once a week;
 5. Persons (other than those in "3" and "4") whose usual place of residence is elsewhere, but who have been away from their usual place of residence for more than 6 months;
 6. Members of the Armed Forces of the Philippines including draftees, sleeping most of the nights with the household, except those who only board or lodge with the household and who usually go home at least once a week; in such a case, they will be enumerated in their own household;
 7. Persons found in the household who have no usual place of residence elsewhere;
 8. Persons found in the household who are not certain of being enumerated elsewhere;
 9. Persons who consider the dwelling unit of the household as their usual place of residence but are living within the premises of a foreign embassy, ministry, legation or consulate, including non-Filipino employees who have been residents of the Philippines before such employment;
 10. Citizens of foreign countries and Filipinos (balikbayan) who have resided or expect to reside in the Philippines for more than one year from arrival;
 11. Persons who sleep in the same dwelling unit but may not be able to take all or some of their meals with the household because of the nature of their work or other similar reason (they take their meals at place of work, etc.), should be considered as part of the household; and
 12. A household member who is alive as of 12:01 A.M., May 1, 1980, but dies prior to the enumeration of the household.

EXPLANATORY TEXT

PERSONS TOTALLY EXCLUDED FROM THE ENUMERATION

Totally excluded from the population count of the Philippines were:

1. Foreign ambassadors, ministers, consuls or other diplomatic representatives, and members of their households (except Filipino employees and non-Filipino employees who had been residents of the Philippines prior to said employment);
2. Citizens of foreign countries living within the premises of an embassy, legation, chancellory or consulate;
3. Officers and enlisted men of U.S. Military or Naval Forces and non-Filipino members of their households, irrespective of residence; foreigners who are civilian employees in U.S. military or naval stations and member of their families living within the premises of said stations or reservation; (Note: for foreigners who are civilian employees of said stations living outside the station or reservation, see Item 5).
4. Citizens of foreign countries who are Chiefs and officials of international organizations like UN, ILO or USAID, who are subject to reassignment to other countries after their tour of duty in the Philippines, and members of their families;
5. Citizens of foreign countries together with non-Filipino members of their families, who are students or who are employed, or have business in the Philippines and have been in the Philippines or expect to stay in the country for one year or less from arrival;
6. Citizens of foreign countries and Filipinos with usual place of residence in a foreign country, who are visiting in the Philippines and expect to stay in the country for one year or less from arrival (e.g. a *balikbayan* who will return to his usual place of residence abroad after a short vacation or visit in the Philippines);
7. Citizens of foreign countries in refugee camps/vessels; and
8. Residents of the Philippines on vacation, pleasure or business trip, etc. abroad, who have been away or expected to be away from the Philippines for more than one year from departure.

USUAL PLACE OF RESIDENCE

The term refers to the geographic place (street, sitio, barrio/barangay, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he sleeps most of the time; hence, it may be the same as or different from the place where he was found at the time of the census.

HOUSEHOLD

A household usually consists of a group of persons who sleep in the same dwelling unit and have common arrangements for the preparation and consumption of food. A person who lives alone is considered as one separate household. Although in most cases a household consists of a related family group, some household members may have no relationship to the central group. Boarders and servants, for instance are counted as part of a particular household if they take their meals with the household and sleep in the same dwelling unit. Persons who sleep with a household but individually cook their meals or eat elsewhere are each considered as single-person household.

EXPLANATORY TEXT

Three generations may be living in one dwelling unit. If they are divided into two or more groups whose eating arrangements are independent from each other, each group is counted as a separate household.

PERSONS NOT LIVING IN HOUSEHOLD

Falling under this category are persons living in collective living quarters such as welfare institutions (orphanages and homes for the aged or infirm); penal and corrective institutions (jails, national penitentiary, and reformatory institutions); hospitals, sanatoria, leprosaria, and nurses homes; dormitories and boarding schools; lodging houses such as hotels, tourist homes and the like; military camps and others.

Most of these institutions house inmates for whom care or custody is provided by resident staff members, or persons residing in group quarters or in housing units on the institutional grounds.

Private families living within such institutions, however, are excluded from the classification, as well as persons (employees, students, etc.) who go home to their families on weekends or days off. Persons found in lodging houses, but who are on vacation or business trips and whose absence from home does not exceed six months on the day of enumeration, are likewise not counted as part of the institutional population.

RESPONDENT

A respondent is any responsible adult member of the household who furnished the information or answers to questions during the interview.

LANGUAGE/DIALECT GENERALLY SPOKEN IN THE HOUSEHOLD

This refers to the language or dialect spoken most of the time by members of the household. In cases where two or more languages/dialects are spoken by household members, the one most often used in conversations among members of the family of the head when most of them are gathered together is considered as the language/dialect generally spoken in the household.

HEAD OF HOUSEHOLD

The person responsible for the care and organization of the household is generally considered as the head of the household. He usually provides the chief source of income for the household.

In the case of a household consisting of two or more unrelated persons sharing a dwelling unit and sharing the same cooking facilities and meals, the head is usually the eldest male or female in the group regarded as such by the other members.

RELATIONSHIP TO HEAD OF HOUSEHOLD

This determines how each household member is related to the head, who is usually the husband or father, although in his absence or if incapacitated, the wife may be designated as head.

1. Spouse — a woman/man married to and living with the head. This includes legal marriages as well as common-law relationships.
2. Son/daughter — the head's own child, stepchild, or adopted child.

EXPLANATORY TEXT

3. Son-in-law/daughter-in-law – refers to a household member related to the head by marriage to his daughter or son.
4. Grandson/granddaughter – child of the son or daughter of the head.
5. Other relative – a household member related to the head by blood, marriage, or adoption. Father, mother, aunts, nephews, parents-in-law and cousins are examples.
6. Others – any person in the household who is usually a non-relative of the head. Boarders and servants fall under this category. Certain members of the household who are related to the head by blood or affinity, but are actually boarders or servants in the household, are classified under “Others”.

For collective households and group quarters, the question on relationship refers to the person's relationship to the institution or establishment, and not to the person recorded as head.

AGE AND DATE OF BIRTH

Data on the age of the population were obtained by asking the respondent the month and year of birth and the age itself of the household member before May 1, 1980. To ensure accuracy, a conversion table on age before May 1, 1980 was prepared for the use of enumerators, editors/coders and verifiers.

MARITAL STATUS

This refers to the civil status of all persons 10 years old and over. A person in this age group is classified as single, married, widowed, separated or divorced, or civil status unknown, based on the following definitions:

- a. Single – If never been married.
- b. Married – Legally married or living consensually with husband/wife without benefit of a legal marriage. A person classified as “married” includes one who remarried after having been widowed, separated or divorced or one temporarily separated from spouse owing to the nature of work, illness or service in the Armed Forces.
- c. Widowed – A person whose spouse died and who has not remarried at the time of enumeration.
- d. Separated – If permanently separated from spouse either legally or otherwise, due to marital discord.
- e. Divorced – If bond of matrimony has been dissolved through a court decree and is therefore free to remarry.
- f. Unknown – If civil or marital status is either not known to the respondent, or the respondent himself refuses to reveal the marital status of such person.

CITIZENSHIP

Citizenship is defined as the legal nationality of a person. A citizen is a legal national of the country of the census; an alien is a non-national of the country.

LITERACY

A person is considered literate if he is able to read and write a simple message in any language or dialect.

EXPLANATORY TEXT

HIGHEST GRADE COMPLETED

This has reference to the specific grade or year completed in elementary school, high school, college or university, by persons 7 years of age and over. Academic degree holders are classified according to the title of the degree received or the major field of study undertaken.

USUAL OCCUPATION

This refers to the specific job or kind of work that a person, who works most of the year, is usually pursuing, or if unemployed at the time of enumeration, it is the kind of work he used to do most of the year. A person is considered as usually working most of the year if he works for at least 10 hours a week for 26 weeks either for pay in cash or in kind, for a fee or profit in own farm, business or establishment or practice of a profession and without pay on family farm or enterprise. This particular group of workers is referred to as gainful workers.

For persons who do not work most of the year, the usual occupation relates to the non-gainful activities they usually do most of the year. Among such persons are housekeepers, students, pensioners, retired and disabled. However, a person who is housekeeping or schooling and also works in a gainful activity was reported as gainfully employed, even if more time was spent housekeeping or studying, as the case may be.

INDUSTRY

Industry refers to the specific character and nature of business or industry or the place where the work is being performed in connection with the job or occupation reported for a person.

EVER-MARRIED WOMAN

This refers to a woman who has already entered married life. Marriage here may either be legal or consensual union. At the time of enumeration the ever-married woman may still be married, or already widowed, separated or divorced.

II – HOUSING

BUILDING

A building is any independent free-standing structure comprising one or more rooms or other spaces, covered by a roof and enclosed within external walls or dividing walls with adjacent building which usually extend from the foundation to the roof. It usually contains one or more rooms internally connected with one another. A building therefore, is any structure intended for dwelling, storage, factory, shelter or for some other useful purposes.

For purposes of the 1980 Census of Population and Housing, only the following buildings were listed and assigned building serial numbers:

- a. A house or any kind of building or shelter where people were actually living;
- b. A residential building (house, apartment or accesorias, condominium) that was vacant;

EXPLANATORY TEXT

- c. Hotel, motel, lodging house, dormitory or camp (construction, logging, mining, etc.) in operation;
- d. A commercial, office, industrial, agricultural or other kinds of buildings with one or more dwelling units (containing a kitchen/kitchen-dining room, living room and a bedroom, and with separate entrance) which were all vacant.

The different types of buildings are:

1. **Single house** – a complete structure intended for one household. It includes the so-called “nipa hut” or a small house that is built as a more or less permanent dwelling unit.
2. **Duplex** – a structure intended for two households, with complete living facilities for each. It is divided either vertically or horizontally into two separate dwelling units which are usually identical.
3. **Apartment/accesoria/condominium/row house**
An apartment is a structure usually of several stories, made up of three or more independent entrances from internal halls or courts. It differs from an accesoria in that an apartment has one common entrance from the outside.
An accesoria is usually a one or two-floor structure divided into three or more dwelling units, each dwelling unit having its own separate entrance from the outside. Another name for accesoria is row house.
A condominium is usually a high-rise building where the dwelling units are owned individually but the land and other areas and facilities are owned in common.
4. **Improvised (barong-barong)** – a makeshift or roughly constructed house usually built with salvaged materials.
5. **Commercial/industrial/agricultural** – buildings not intended for human habitation but used as dwelling units at the time of the census.
Commercial – a building used for transacting business or rendering professional services, such as a storage or an office building.
Industrial – a building used for processing, assembling, fabricating, finishing, manufacturing or packaging operations, such as a factory or a plant.
Agricultural – any structure used for agricultural purposes, such as a barn, warehouse, rice mill, etc.
6. **Other housing unit (natural shelter, boat, etc.)**
This refers to living quarters which are not intended for human habitation nor located in permanent buildings but which are, nevertheless, used as living quarters at the time of the census. Caves, other natural shelters and mobile housing units such as trailer, barge, boat, etc., fall within this category.
7. **Hotel, lodging house, dormitory, etc.** – This group comprises permanent structures which provide lodging and/or meals on fee basis. Hotels, motels, inns, boarding houses, dormitories, pensions and lodging houses fall within this category.
8. **Institutional (hospital/convent/school dormitory/penal institution, etc.)** – a building intended for persons confined to receive medical, charitable, or other care treatment such as jails and penal colonies, and other buildings like convents, school dormitories, etc.
9. **Other collective living quarters** – any structure or shelter which does not fall under items 7 and 8. Included in this category are camps which are defined sets of

EXPLANATORY TEXT

premises originally intended for the temporary accommodation of persons with common activities or interests like military camps, and other camps established for the housing of workers in mining, agriculture, public works or other types of enterprises.

DWELLING UNIT

A dwelling unit is a separate and independent place of abode intended for habitation by one household, or one not intended for habitation but occupied as living quarters by a household at the time of the census.

Dwelling units counted included those that are occupied and those that are unoccupied.

CONSTRUCTION MATERIALS OF ROOF

The kinds of materials used are as follows:

1. Galvanized iron/aluminum
2. Tile/concrete/brick/stone
3. Asbestos
4. Cogon/nipa
5. Makeshift/salvaged materials
6. Others (anahaw, etc.)

CONSTRUCTION MATERIALS OF OUTER WALLS

The kinds of materials may be any of the following:

1. Galvanized iron/aluminum
2. Tile/concrete/brick/stone
3. Wood/plywood
4. Mixed tile/concrete/brick/stone and wood/plywood
5. Asbestos
6. Bamboo/sawali
7. Cogon/nipa
8. Makeshift/salvaged materials
9. Others (anahaw, etc.)

If the roof or outer walls are constructed of two or more materials the material most used was reported.

YEAR BUILDING WAS BUILT

This refers to the year when the extent of construction permitted occupancy for living purposes. The year reported was the particular year when the occupancy started or when the building was fit for occupancy even if not occupied.

NUMBER OF ROOMS IN THE DWELLING UNIT

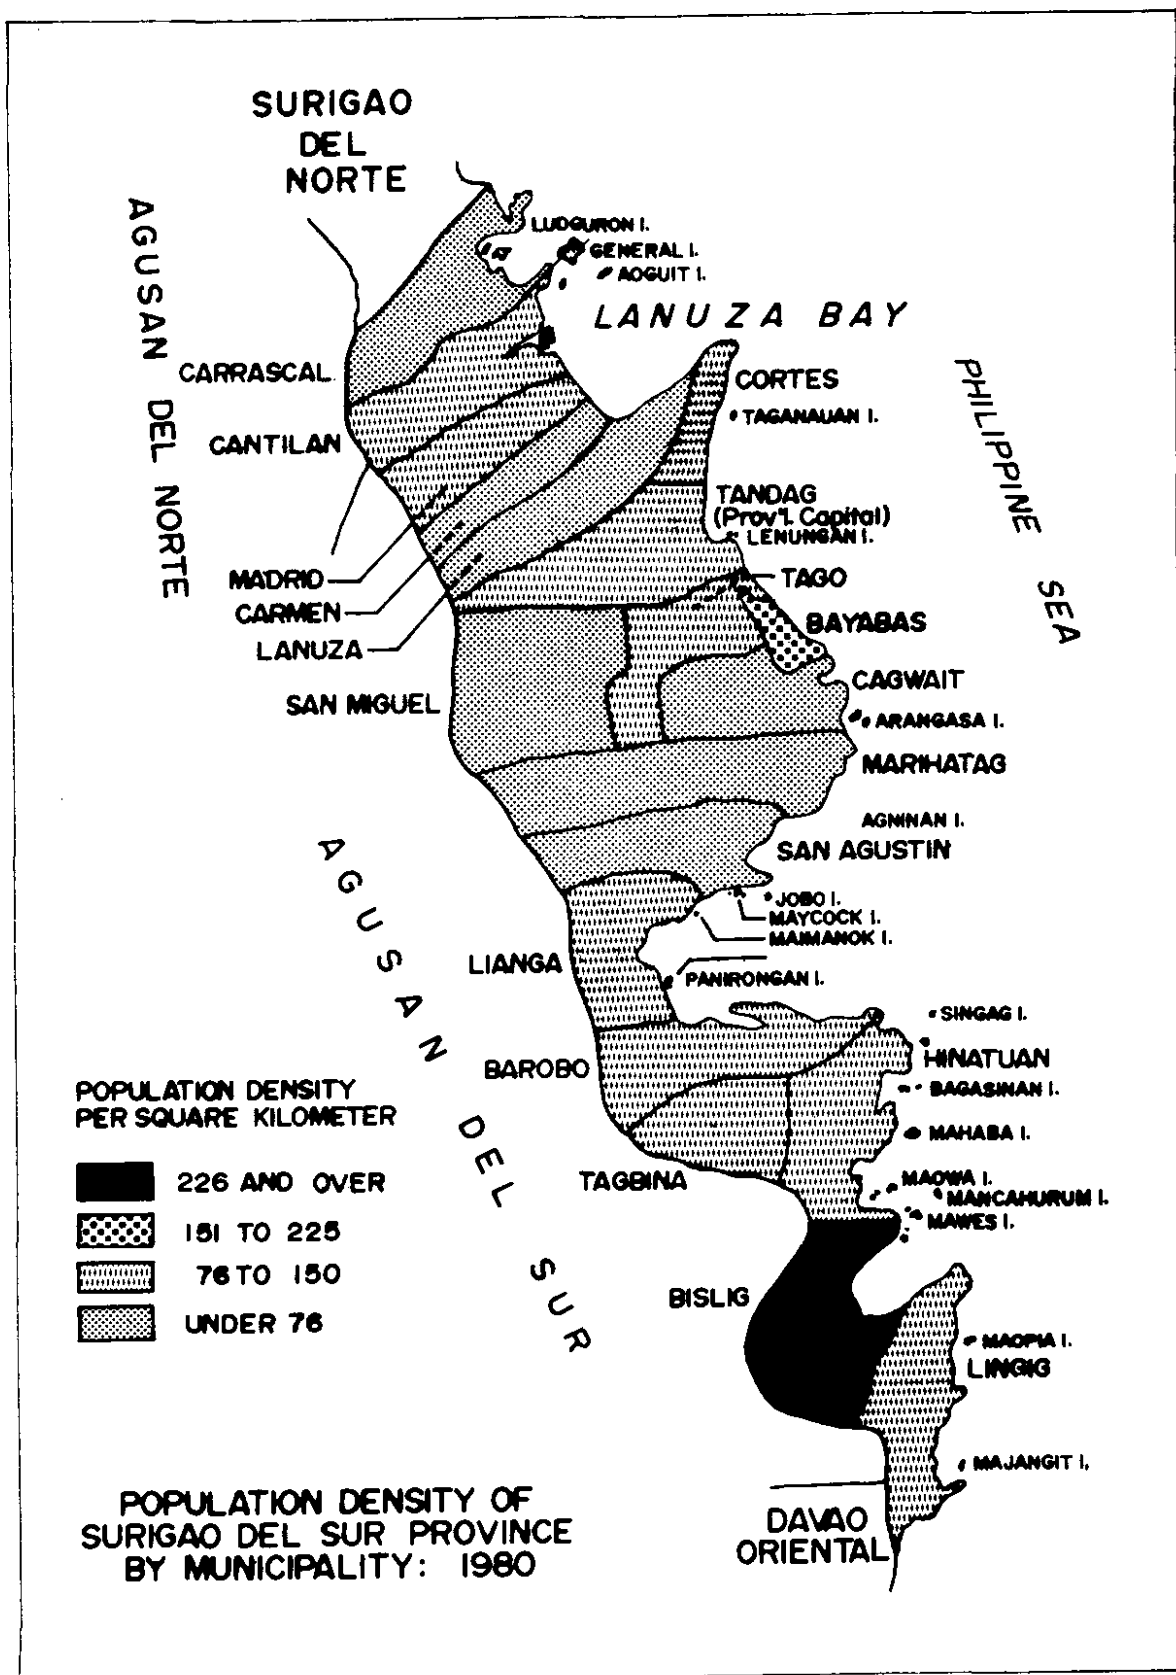

A room is defined as a space in a dwelling unit or other living quarters enclosed by walls reaching from the floor to the ceiling or roof covering, or at least to a height of 1.8 meters which are of permanent or semi-permanent structure, of a size large enough to hold a bed for an adult or at least has an area of 3 square meters.

EXPLANATORY TEXT

The total number of rooms reported included the bedrooms, dining room, living room, kitchen, roofed veranda, library or music room and other separate spaces used or intended for dwelling purposes, as long as they meet the criteria of walls and floor space. Passageways, lobbies, bathrooms and toilets or rooms used exclusively as store/shop/clinic/grains storage (nobody sleeps therein) were not counted as rooms even if they meet the criteria.

FLOOR AREA OF DWELLING UNIT

This refers to the space enclosed by the exterior walls of the dwelling unit, or the space measured inside the outer walls of the spaces that are counted as rooms. In case of several floors, the area of each floor in square meters was taken and added together to get the total floor area of the dwelling unit. Areas of floor spaces that are not considered rooms such as bathroom, toilet, storeroom, passageway were excluded in determining the floor area.

Surigao del Sur: A Brief Analysis

Surigao del Sur was created as a separate province from Surigao del Norte on June 19, 1960 under R. A. No. 2786. Located on the northeastern coast of Mindanao, the province is bounded on the north by Surigao del Norte, on the east by the Philippine Sea, on the west by the provinces of Agusan del Norte and Agusan del Sur, and on the south by Davao Oriental. The general shape of the province is elongated, extending from the northeastern municipality of Carrascal to the southernmost municipality of Lingig. It is approximately 175 kilometers in length and at its widest stretch, 50 kilometers in width. Lining the northern boundary of the province is the Diwata Range.

Surigao del Sur has vast agricultural lands, large timber lands and huge iron deposits. Important ports of the province like Lanuza Bay, Lianga Bay and Bislig Bay are situated along its irregular coastline. Offshore coral reefs and small islets make the province almost inaccessible to big shipping vessels. A few miles from the eastern coast is the world's second deepest trough (10,789.92 meters) known as the Philippine Deep.

The land area of the province is 4,552.2 square kilometers, constituting 1.5 percent of the total land area of the Philippines. Almost three-fourths or 73.3 percent of its land area consists of highlands and forest covered mountains. Because of its abundant forest growth, the province is now the site of factory plants like the Paper Industries Corporation of the Philippines, the Lianga Bay Logging Company, the Aras-asan Timber Company, and the Puyat and Sons Timber.

Surigao del Sur originally consisted of 13 municipalities. However, six more were created over a ten-year span, thus 19 municipalities, most of which are located in the coastal areas, presently compose the province with Tandag as its capital.

POPULATION

As of May 1, 1980, Surigao del Sur had 377,647 inhabitants of whom 190,890 were males and 186,757 were females. The population density of the province increased from 66.4 in 1975 to 83.0 or an increase of 16.6 persons per square kilometer within a period of five years. Its annual geometric growth rate, likewise, increased from 3.17 percent in 1975 to 4.55 percent in 1980.

Urbanization gained some headway during the last censal year. Although close to 70 percent (69.92%) of the population still live in the rural areas and 30.08 percent, in the urban areas, the 1980 proportion of urban population is 7.04 percentage points higher than

A BRIEF ANALYSIS

the 1975 figure. It is interesting to note that the proportion of rural population decreased between 1975 (76.96%) and 1980 (69.92%). Compared to 1970, however, the 1975 urban population dropped by 3.59 percentage points, indicating that more people moved to rural areas which may be attributed to the opening of factories and logging firms in these areas during the period.

A comparative breakdown of the population classified according to urban-rural residence and sex is shown below:

**TABLE A — URBAN-RURAL POPULATION BY SEX,

Female	129,789	34.37	113,979	37.70	93,900	36.30

The sex ratio (number of males for every 100 females) of the province slightly dropped from 103.43 in 1975 to 102.21 in 1980. The sex ratio in the rural areas (103.43) was higher than in the urban areas (99.44).

Table 3 presents a picture of the population distribution by age group. It is noted that in both the urban and rural areas, a large number of the male and female population are under 5 years of age. From this age group to the 80 years old and above, the population (male and female) respectively decreases as each age group grows older, thus forming a pyramid-like structure with the broad base formed by the under 5 years of age and the apex, by the 80 years old and above. The same structure applies to both the urban and rural population.

AGE COMPOSITION

Surigao del Sur still has a high proportion of the younger age group (0-14 years). Although a downward trend has been observed in the last three censal years, 44.76 percent of the provincial total compose this group which decreased by a mere 0.98 percentage point from 45.74 percent in 1975. Meanwhile, the 15-64 year olds, considered as the productive age group, registered an upward trend. After an increase of 1.41 percentage points between 1970 and 1975, it went up very slightly by 0.70 percentage point to 52.77 percent in 1980. The older age group (65 years and over) constitutes a small portion of the provincial pop-

A BRIEF ANALYSIS

ulation (2.47%), showing a very slight increase of 0.28 percentage point between 1975 and 1980.

The rural areas have bigger proportion of the younger age group than the urban sector – 45.05 percent against 44.10 percent. As a result, the productive age group is higher in urban (53.62%) than in rural areas (52.40%).

Below are comparative figures showing the age composition of the population in three censal years:

**TABLE B – AGE COMPOSITION OF THE POPULATION,
SURIGAO DEL SUR: 1970, 1975 AND 1980**

65 years and over	9,321	2.47	6,638	2.19	5,679	2.20

A BRIEF ANALYSIS

The median age of the population is 17 years, a year more than the 1975 figure. The trend shows that the population of the province is growing older.

With the increased percentage of persons in the productive age, the dependency ratio was lower in 1980 than it was a decade ago. The dependency ratio dropped from 97.40 in 1970 to 92.06 in 1975 and slid further to 89.50 in 1980. The urban dependency ratio (86.49) was lower than the rural dependency ratio of 90.83.

MARITAL STATUS

Married persons consistently held the highest proportion of the population 10 years old and over for the past three censuses: 50.56 percent in 1970, 49.69 percent in 1975 and 52.55 percent in 1980. After an increase of 1.92 percentage points between 1970 and 1975 (from 45.11% to 47.03%), the proportion of never married persons went down by 3.40 percentage points to 43.63 percent in 1980. Slight increases were noted in the other cate-

A BRIEF ANALYSIS

gies between 1975 and 1980. Widowed persons increased by 0.35 percentage point; the divorced or separated, by 0.14 percentage point and those with unknown status, 0.05 percentage point.

More than half of the rural (53.25%) as well as the urban (50.94%) populace aged 10 and over were married. Consequently, never married persons comprised 42.80 percent in the rural areas and 45.53 percent in urban areas.

Of the male population 10 years old and over, 45.81 percent were single, 3.58 percentage points lower than the 1975 proportion (49.39%). Married males, on the other hand, increased 3.14 percentage points to 51.91 percent and widowed males, 0.26 percentage point to 1.86 percent. The same trend is noted in the proportion of divorced or separated males which went up by 0.14 percentage point from 0.22 percent in 1975. Among the females, 41.40 percent were never married, following a decrease of 3.19 percentage points from 44.59 percent in 1975. This may be attributed to an increase in the proportion of married females from 50.64 percent to 53.21 percent. The widowed and divorced or separated, likewise, registered respective increases of 0.44 and 0.12 percentage points (Table 4).

The succeeding tables shows the classification of the population by sex and marital status:

A BRIEF ANALYSIS

HIGHEST GRADE COMPLETED

As in the past census, persons with elementary education comprised a large majority (60.87%) of the private household population 7 years old and over, although a decrease of 3.70 percentage points is noted over the 1975 proportion. On the other hand, those who reached the secondary and college levels increased respectively by 3.90 and 1.75 percentage points. Academic degree holders likewise increased by 0.53 percentage point. While the proportion of persons whose educational attainment was not reported dropped from 3.16 percent to 0.35 percent, that of persons who had not completed any grade slightly rose from 7.68 percent to 8.01 percent.

Of those who had elementary training, only 29.70 percent graduated from the sixth or seventh grade. More than one-third (36.56%) did not go beyond the third grade; 18.59 percent attained the fourth grade and 15.15 percent, the fifth grade. Among those with secondary education, a little over two-thirds (66.70%) reached anywhere from first to third year while 33.30 percent graduated from fourth year. Majority of the college undergraduates (82.62%) finished the lower collegiate years (first to third year) and only 17.38 percent completed the fourth or higher year (Table 5).

**FIG. 4 – PERCENTAGE LITERACY OF PRIVATE HOUSEHOLD POPULATION
10 YEARS OLD AND OVER BY SEX, URBAN-RURAL, SURIGAO DEL SUR: 1980**

A BRIEF ANALYSIS

LITERACY

Surigao del Sur has a high literacy rate, with 82.30 percent of the total private household population aged 10 and over able to read and write. Urban literates (92.41%) are higher in proportion than their rural partners (77.90%). Of the 210,632 literate persons, 49.88 percent are males and 50.12 percent are females. Male and female literates are almost equal in proportion in urban areas, 92.25 percent and 92.57 percent, respectively. In the rural areas, the females turned out more literates (79.10%) than the males (76.75%).

LANGUAGE OR DIALECT

Of the 19 dialects and languages reported spoken in Surigao del Sur, Cebuano stands out as the major dialect of the province. Out of 66,102 private households, 74.70 percent speak Cebuano while 20.51 percent converse in Surigaonon/Camayo (a mixture of major Visayan dialects and the native dialect exclusive only to native born Surigaonons). Manobo is spoken by 1.57 percent; Lineyte-Samarnon (Waray), 1.05 percent and Hiligaynon, 0.84 percent (Table 7).

A BRIEF ANALYSIS

GAINFUL OCCUPATION

Gainful workers compose only 48.77 percent of the total private household population 15 years old and over; more than half or 51.23 percent are in non-gainful activities.

The number of gainful workers has increased to 101,453 from 77,406 in 1975. The province is basically agricultural; a large proportion (63.42%) of the total gainful workers are agricultural, animal husbandry and forestry workers, fishermen and hunters despite a decrease of 6.27 percentage points from 69.69 percent in 1975. Following far behind are the production and related workers, transport equipment operators and laborers, accounting for 15.13 percent, which is 2.05 percentage points higher than the 1975 figure of 13.08 percent. Service workers constitute 6.87 percent, 2.12 percentage points higher than the previous proportion (4.75%). Professional, technical and related workers account for 5.10 percent and sales workers, 4.22 percent. Both occupation groups posted respective gains of 0.93 and 0.30 percentage point while clerical and related workers, at 2.96 percent, decreased by 0.17 percentage point. Administrative, executive and managerial workers, on the other hand, remained at 0.53 percent. Workers not classifiable by occupation account for only 1.77 percent (Table 8).

The following table shows the distribution of gainful workers 15 years old and over by major occupation group:

Workers not classifiable by occupation	1,795	1.77	564	0.73

A BRIEF ANALYSIS

INDUSTRY

Agriculture, fishery and forestry, the dominant industry group in the province, provide means of livelihood to over-two-thirds (66.77%) of the total gainful workers 15 years old and over. Most of the agricultural workers derive their income from agricultural crop production (79.05%) and more than 20 percent, from fishery (11.59%) and forestry (8.86%). Community, social and personal services comprise more than one-tenth (13.55%) of the total gainful workers; 7.65 percent are in manufacturing; 4.39 percent, wholesale and retail trade; 2.37 percent, construction and 2.31 percent, transportation, storage and communication. Financing, insurance, real estate and business services constitute only 1.09 percent while electricity, gas and water (0.45%) and mining and quarrying combined (0.07%) comprise less than one percent. Activities not adequately defined make up 1.35 percent (Table 9).

A BRIEF ANALYSIS

MIGRATION

Of the 313,086 persons 5 years old and over, 91.19 percent were residents of the same municipality where they had lived on May 1, 1975. Of the 27,583 persons or 8.81 percent who changed residence, 4.31 percent moved to another municipality within the province (intra-provincial migrants); 4.26 percent moved to another province (inter-provincial migrants) while 0.24 percent were residents of foreign countries. In both the intra-provincial and inter-provincial movements, the males outnumbered the females by only 0.03 and 0.14 percentage point, respectively. The proportions of males (0.13%) and females (0.11%) residing in foreign countries for the same period were almost equal (Table 10).

TYPE OF BUILDING

Of the 66,102 households of Surigao del Sur, 92.85 percent are occupying single houses. The rest live in duplex (2.32%), apartments/accesorias/condominiums/row houses, etc. (0.92%), improvised structures like barong-barong (3.52%), commercial/industrial/agricultural buildings (0.25%), other housing units such as natural shelter and boat, (0.09%), institutional buildings like hospital, convent and school dormitory (0.02%), hotels, lodging houses, dormitories, etc. (0.02%) and other collective living quarters like military camp (0.01%).

Single house dwellers are found mostly in the rural areas – 72.58 percent as against 27.42 percent in the urban areas. In contrast, duplex dwellers are more common in the urban (79.56%) than in the rural areas (20.44%). Likewise, more households living in improvised structures are found in the urban (54.83%) than in the rural areas (45.17%). This also holds true for apartment/accesoria/row house occupants, a bigger proportion of which are in the urban areas (71.17%) and only 28.83 percent in the rural areas. Likewise, households in commercial/industrial/agricultural buildings are mostly located in the urban (71.69%) than in the rural areas (28.31%).

A BRIEF ANALYSIS

TYPE OF OCCUPANCY

Of the total households, 54,884 or 83.03 percent are owners of their dwelling units. The rest of the households are distributed as follows: 10.57 percent, tenant/lessee; 0.77 percent, subtenant/sublessee and 5.63 percent, rent-free occupant.

A little less than three-fourths (74.72%) of the owner-occupants are in the rural areas and only 25.28 percent are in the urban areas (Table 1).

CONSTRUCTION MATERIALS OF ROOF AND OUTER WALLS

Nearly two-thirds or 66.18 percent of the total households in Surigao del Sur are living in dwelling units with roof made of cogon or nipa and 19.94 percent, in dwelling units constructed with roof of galvanized iron or aluminum. Households in dwelling units with roof of tile, concrete, brick or stone and asbestos constitute only 0.77 percent while those in units with roofs of makeshift or salvaged materials and others such as anahaw make up 11.11 percent. Majority of the households in the urban (51.85%) as well as in the rural areas (75.24%) dwell in units constructed with roof of cogon or nipa. In the urban areas, however, households living in units with roofs built of galvanized iron or aluminum comprise 31.32 percent compared to 15.02 percent in rural areas. The proportion of households occupying dwelling units with roof of makeshift or salvaged and other materials is also higher in urban (16.37%) than in rural areas (8.83%).

By construction materials of outer walls, 60.80 percent of the household are in dwelling units with walls made of wood or plywood and 22.41 percent, with walls of cogon or nipa. Occupants of dwelling units constructed with walls of strong materials (galvanized iron/aluminum, tile/concrete/brick/stone, wood/plywood, mixed tile/concrete/brick/stone and wood/plywood, and asbestos) make up only 6.40 percent compared to 10.39 percent in units with walls of light materials (bamboo/sawali, makeshift/salvaged materials and other such as anahaw). In both urban and rural areas, majority of the households dwell in units with walls built of wood or plywood (71.51% and 56.17%, respectively). However, the proportion of households in units built with walls of cogon or nipa is higher in rural (28.36%) than in urban (8.63%) areas (Table 2).

YEAR BUILT

More than half or 54.58 percent of the total households are occupants of structures built in 1976-1980; 22.78 percent occupy structures built during 1971-1975; 15.09 percent, 1961-1970 and 4.43 percent, 1951-1960. Only 1.35 percent still live in buildings constructed in 1942-1950 and 1.77 percent, in 1941 or earlier (Table 2).

FLOOR AREA OF DWELLING UNIT

A large percentage (51.99%) of the households live in dwelling units with floor area less than 30 square meters. Less than one-third or 32.12 percent occupy dwelling units with floor area 30-49 square meters; 8.00 percent, 50-69 square meters and 4.27 percent, 70-99 square meters. A few households (2.10%) occupy dwelling units with floor area of 100-149 square meters while the remaining 1.52 percent live in spacious dwelling units with floor area of 150 square meters and over (Table 3).

A BRIEF ANALYSIS

TENURE OF OWNER-OCCUPANT WITH RESPECT TO THE LAND

Of the 54,884 households that own their dwelling units, 65.88 percent also own the land where the structures are erected. The rest are distributed as follows: lessee/sublessee, 18.83 percent; farm lessee/agricultural tenant of landowner, 6.10 percent; other legal tenure, 2.44 percent and no tenure (squatter, etc.), 6.75 percent (Table 4).

SOURCE AND USE OF WATER SUPPLY

As shown in Table 6, the faucet, community water system is the main source of water supply for the households in the province for drinking (25.59%) and for kitchen use (23.02%). For washing clothes, however, the most common sources are lake, river, stream, irrigation, etc. (24.92%). Other sources of water supply for drinking are spring (21.55%), tubed/piped deep well (17.48%), tubed/piped shallow well (14.67%); dug well (14.31%), rain (3.91%) and lake, river, stream irrigation, etc. (2.49%). Almost the same proportions of households utilize water from these sources for kitchen use: spring, 21.60 percent; tubed/piped deep well, 16.82 percent; tubed/piped shallow well, 15.00 percent and dug well, 16.04 percent. Only 3.01 percent utilize rain water and 4.51 percent, lake, river, stream, irrigation, etc.

For washing clothes, 17.98 percent depend on the faucet, community water system; 13.27 percent, tubed/piped deep well; 10.35 percent, tubed/piped shallow well; 14.15 percent, dug well; 16.95 percent, spring and 2.38 percent, rain.

KIND OF LIGHTING FACILITIES

Almost three-fourths (74.98%) of the total households still use kerosene for lighting and nearly one-fifth (19.99%), electricity. The rest are divided as follows: 4.73 percent use liquefied petroleum gas (LPG); 0.06 percent, oil and 0.24 percent, other kinds of lighting facilities.

A great majority of the households using kerosene are concentrated in the rural areas (85.40%) compared to 50.85 percent of the urban households. On the other hand, the proportion of users of electricity is markedly higher in urban than in rural areas (46.77% against 8.41%). Liquefied petroleum gas is used by 2.35 percent of the urban households and 5.76 percent of the rural households. No household in the urban areas utilize oil while 0.09 percent of the rural households use oil for lighting (Table 5).

COOKING FUEL

Wood or charcoal is the most common type of cooking fuel in the province, with 59,137 households or 89.46 percent of the total number using it. Very few or 0.66 percent use electricity; 8.74 percent utilize kerosene; 0.91 percent, liquefied petroleum gas and only 0.23 percent, other kinds. In both the urban and rural areas, wood or charcoal is used by majority of the households — 86.57 percent for the former and 90.71 percent for the latter. Kerosene is used by 10.43 percent of the urban households compared to 8.02 percent of the rural households. Users of electricity constitute 1.12 percent in the urban areas and only 0.46 percent in the rural areas. Likewise, households using liquefied petroleum gas make up 1.65 percent in the urban areas and only 0.58 percent in the rural areas (Table 8).

A BRIEF ANALYSIS

TYPE OF TOILET FACILITIES

More than one-third (34.24%) of the households in the province use the water-sealed with other depository and 19.31 percent, water-sealed with sewer/septic tank type of toilet facilities. The closed pit (antipolo, etc.) is used by 13.81 percent; open pit, 10.02 percent and other (pail system, etc.), 1.83 percent. More than one-fifth (20.79%) of the total households are still without toilet facilities.

Most of the urban households use water-sealed toilet with sewer/septic tank (37.71%) and water-sealed with other depository (35.95%). On the other hand, many rural households (33.50%) use water-sealed with other depository type: only 11.35 percent have the water-sealed with sewer/septic tank. Other rural households use the closed pit (16.04%) and the open pit (11.74%) while urban households using these types comprise 8.65 percent and 6.06 percent, respectively. Households without toilet facilities total 25.19 percent in rural areas and 10.62 percent in urban areas (Table 7).

OWNERSHIP OF RADIO, TELEVISION SET AND REFRIGERATOR/FREEZER

A little over one-half (51.74%) of the total households own radios while only 2.33 percent own television sets and 4.91 percent, refrigerators or freezers (Table 9).

Urban households with radios make up 65.41 percent and rural households, 45.83 percent. Television set owners in the urban areas account for 4.46 percent; the proportion is only 1.41 percent in the rural areas. Likewise, a higher proportion of refrigerator or freezer owners is observed in the urban (10.08%) than in the rural areas (2.68%).

PERSONS TO BE ENUMERATED AS MEMBERS OF COLLECTIVE HOUSEHOLDS

1. HOTELS, LODGING HOUSES, DORMITORIES, ETC.

- a. Proprietor, manager and employees living in the establishment, except those living therein with their own families and those who usually go home to their respective families at least once a week.
- b. Permanent lodgers/boarders (those who have stayed or expect to stay for one year or longer) and those temporary lodgers/boarders who have stayed for six months or longer as of May 1, 1980 or have been away from their own families for the same period. However, exclude those who usually go home at least once a week.
- c. Lodgers/boarders who are not residents of the Philippines and who have been in the Philippines for one year or longer as of May 1, 1980, or expect to stay in the Philippines for one year or longer. However, exclude those who have temporary place of residence elsewhere in the Philippines to where they usually go home. Exclude also diplomatic representatives or UN, ILO or USAID officials who, like diplomatic representatives, are subject reassignment to other countries after their tour of duty in the Philippines, and members of their families.

2. HOSPITALS AND NURSES' HOMES

- a. All patients, including those just confined, in mental hospitals, leprosaria or leper colonies, pavilions of tuberculosis sanatoria where patients stay more or less permanently, and rehabilitation centers for drug addicts.
- b. Patients who have been confined for six months or longer as of May 1, 1980 in other kinds of hospitals and in wards for temporary confinement in tuberculosis sanatoria.
- c. Nurses in nurses' homes who do not usually go home at least once a week.
- d. Staff members and employees living in hospitals/nurses' homes, except those living therein with their families and those who usually go home at least once a week.

3. WELFARE INSTITUTIONS (Homes for the Aged and Infirm, Orphanage, Boys' Town, etc.)

- a. All inmates or wards, including those just confined.
- b. Staff members and employees living in the institutions, except those living therein with their families and those who usually go home at least once a week.

4. CORRECTIVE AND PENAL INSTITUTIONS

- a. All prisoners in national prisons and reformatories (welfareville).
- b. Prisoners and detainees in provincial or city/municipal jails who have been continuously confined for six months or longer, including confinement elsewhere, as of May 1, 1980, or those whose sentence is for six months or longer even if the sentence is on appeal.
- c. Staff members and employees living in the institutions except those living therein with their own families and those who usually go home at least once a week.

5. CONVENTS, NUNNERIES, SEMINARIES, AND BOARDING SCHOOLS
